

# THE FUTURE

We Have a Trade Algorithm

## The Edge

Algorithmic trading now comprises up to 80% of market activity anywhere in the world. It does not matter if you're in forex or Bitcoin, robots are trading against you.

We give you that edge by getting all the trade alerts from our in-house algorithm.

## Profitability Is a Reality

You can try to convince yourself that you can beat the markets. You can try to tell yourself that no matter what, you can be better than the major banks and their machines. The reality is, you are not and you can never be. Even after decades of technological improvements, human traders are still only 5% successful at trading. Algorithmic trading which is run by supercomputers can think a hundred times faster than a human brain.

**Q: What markets do we serve?**

A: Stocks. Futures. Forex. Bitcoin.

**Q: How do we send alerts?**

A: Text Message (SMS), Twitter, Live Room

If you're an active trader, you can't squander this opportunity to join a group of profitable traders. Let our algo do the hard work and reap the benefits.

Your next profitable trade is waiting. What will you do next?

*"I've been a client for 7 months and your automated trade alerts are about 79% accurate which beats my laughable 20% hit rate when I traded on my own."*
